Monitoring housing land supply in Kent

The annual housing land supply monitoring study forms part of the Kent County Council Housing Information Audit (HIA). Historic reports are available for all Local Authorities in the Kent County Council (KCC) area. Medway Unitary Authority conducts and produces its own housing land supply report.

The HIA is managed and co-ordinated by the KCC Business Intelligence, Research and Evaluation Team on behalf of the Kent Planning Officers Group (KPOG). It presents and maintains a series of surveys that have been undertaken since 1980. Although the nature & content of the survey has changed over the years the aim of monitoring Development Plan documents (DPD) to meet dwelling requirements and contributing to the county housing strategy has not. It also provides a level of co-operation and consistency across the local authorities in Kent.

This document is intended to be an assessment at the 31st March each year. Housing land and supply is constantly changing as sites are built out or expire and others obtain planning permission. Coupled with this local authorities have to consider and assess their housing requirements (both supply and demand) based on population forecasts. Therefore for the most up-to-date information readers should check the current requirements and policy position with individual local authorities. Some local authorities produce an annual 'Authority Monitoring Report' (AMR) usually in the autumn of each year which may provide a more comprehensive picture.

Introduction

Local Planning Authorities are required to assess whether they can meet the housing requirement for their area. The [National Planning Policy Framework](#) (NPPF) requires that local planning authorities update their five year housing land supply assessment on a yearly basis.

Following the abolition of regional strategies and plans, it became the responsibility of the local planning authority to determine local housing requirements based on objectively assessed needs (OAN). However, a review of housing requirements has not yet been completed by all Kent local authorities and Local Plans are still emerging for some districts. For the current position please contact the individual local authority in question.

Use of the Data

This bulletin is one of a series on different topics. The data are used for a variety of purposes; generally as evidence and intelligence to monitor and support Kent County Councils (KCC) business performance. The information is also used to support KCC projects, policies and initiatives such as in the formulation of policy, monitoring resources, answering questions, queries and benchmarking against other authorities.

The various bulletins are used by and distributed to Kent Local Authority planning policy teams, KCC household population forecasting, KCC district profiles dashboard, KCC Education department, KCC Locate in Kent, the Kent Housing Group (KHG) and the Kent Developers Group (KDG).

Development Plan Documents

The [Development Plan Documents](#) (DPDs) are the starting point for decision making and will set out planning policies and proposals that include the following:

- The Local Plan or Core Strategy which will contain strategic land use allocations and general policies.
- 'Site Specific Allocations and development management policies' which will identify other sites allocated for specific uses and set out more detailed policies for controlling development.
- Area Action Plans

The Local Plan (Formerly the Core Strategy)

The Local Plan (LP) is the main strategic policy document of the DPD. It sets out the vision for the area over the next 10 to 20 years and the policies intended to enable this to be achieved.

There are a number of formal stages in the process of producing the Local Plan/Core Strategy, each governed by legal regulations.

The Key Stages are set out below. However for reference they can be summarised as:

- Evidence gathering, consideration of options and issues.
- The chosen option.
- The formal submission to the Secretary of State.
- The Public Examination.

The 5 year land supply

The NPPF (paragraph 47) states that local planning authorities should identify a five-year supply of deliverable housing sites against their housing requirements and should include an additional 'buffer' of 5% or 20% to ensure choice and competition in the market for land (moved forward from later in the Plan period).

The buffer is to be 5% in normal situations, or 20% if a local authority has persistently under-delivered on housing in the past. The buffer will consist of sites brought forward from later in the plan period, so the overall housing requirement remains the same over the duration of the plan. The impact of the buffer is that the five year supply now must be able to demonstrably meet a 105% requirement within the first 5 years. This document does not attempt to identify the actual 5% and 20% buffer sites.

The NPPF (paragraph 48) states that local planning authorities may include an allowance for windfall sites in the five year supply subject to:

- Compelling evidence that such sites have consistently become available in the local area and will continue to provide a reliable source of supply.
- The allowance being realistic having regard to the Strategic Housing Land Availability Assessment, historic windfall delivery rates and expected future trends where applicable.
- The allowance should not include residential garden land.

The purpose of a windfall allowance is to account for housing development on sites where it is not possible to identify sites in advance.

Strategic Housing Land Availability Assessment (SHLAA) sites that are realistically expected to be delivered within 5 years and meet the NPPF criteria of: available now, suitable and deliverable, can be included in the five year housing land supply calculation at the districts' discretion.

Land supply years 6 to 10 and 11 to 15

Paragraph 47 of the NPPF also includes a reference to identifying a supply of specific developable sites or broad locations for years 6-10 and where possible for years 11-15. It expects the local authority will illustrate the rate of housing delivery through a housing trajectory for the plan period.

Implementation of the NPPF

The NPPF (Paragraph 213) says 'Plans may, therefore, need to be revised to take into account the policies in the NPPF. This should be progressed as quickly as possible, either through a partial review or by preparing a new plan'.

The NPPF (Paragraph 215) states 'in other cases, due weight should be given to relevant policies in existing plans according to their degree of consistency with this framework'.

The NPPF (Paragraph 216) says. From the day of publication, decision-takers may also give weight to relevant policies in emerging plans according to:

- The stage of preparation
- The extent to which there are unresolved objections
- The degree of consistency of relevant policies in the emerging plan to the policies in the NPPF.
