

Making Kent Quicker Update – May 2014

The Making Kent Quicker Project is working hard to bring better broadband to parts of Kent and Medway that would otherwise not benefit from the commercial rollout of superfast broadband services.

Over sixty new green cabinets have now gone live, meaning that thousands of homes and businesses are now able to order faster broadband services from their chosen provider. Many more are on the way over the next few months.

Here's what you need to do to find out whether your home or business can already benefit:

- 1. Check whether your home and business is included in the list of postcodes below of the areas which have already gone live.** If it isn't, have a look at our postcode checker to see what is planned or already available for your area (www.kent.gov.uk/broadband). Unfortunately, not all premises within identified postcodes will be able to access faster broadband services (see below) and the easiest way to check whether you can receive a service is to try and place an order (Please note that if your supplier states that you cannot order a superfast fibre-based broadband product, please check whether you can order a faster broadband product as sometimes this is option is not always highlighted to the customer). Alternatively, you could enter your phone number or address on the BT wholesale website and if one of the featured products lists 'FTTC' (fibre to the cabinet), you should be able to purchase faster broadband services at that address <http://www.dslchecker.bt.com/adsl/adslchecker.welcome>.
- 2. To access the new services you will need to contact your chosen broadband service provider (ISP)** and order a fibre-based service upgrade. Please note that not all ISPs will immediately offer a service once cabinets are 'ready for service' and there may be a short delay with your chosen provider. You will also need to be aware of your existing contractual commitments – although most providers will allow customers in existing contracts to upgrade to a fibre package.
- 3. An engineer will then need to visit your property to install the necessary equipment to enable the service.** This will include replacing the face plate on the BT master socket and enabling the service at the local fibre cabinet.

Please note:

Whilst this project is bringing better broadband to many areas that would otherwise not benefit from upgraded services, not all premises in identified postcode areas will be able to order faster fibre-based broadband services. This may be because:

- Some postcode areas are split into different delivery phases for this project (look at the postcode checker on www.kent.gov.uk/broadband for more information)
- Properties are not always connected to the nearest street cabinet – your broadband service provider should be able to give you more detail if this relates to you.
- Some properties are too far away from their nearest street cabinet to benefit from a speed uplift. Where these properties are currently receiving a service of less than 2mb, the Making Kent Quicker Project has funding to look at alternative technical solutions.

Unfortunately cost constraints mean that it is not possible to bring superfast broadband to all premises within this project. We appreciate how important better broadband is to our residents and

businesses so we are working hard looking at all the options – including a new Government funded programme, to further extend the reach of superfast broadband services.

Postcodes where services have already gone live

The list below identifies those postcodes (and exchange areas) where BT Openreach has formally confirmed to KCC that services have now gone live. It is important to note that:

- KCC is currently receiving data from BT Openreach on quarterly basis so there is a lag between when services are going live (and are ready to order by the consumer) and when KCC is formally notified. As a result, there may be postcodes in current deployment phases which can now place an order for faster services but are not set out in the list below.
- For the reasons set out above, not all premises in the identified postcode areas may be able to order fast services as postcode boundaries do not always match the footprint of the services and we are unable to publish individual address details.
