[Kent facts and figures](#)

There is no single definitive measure of child poverty. This bulletin looks at several measures focusing on child poverty and deprivation. Data is presented for the Kent County Council area and provides national and regional comparisons where available.

Summary

- In 2023/24, 14.8% of children aged under 16 are living in absolute low-income families in Kent (45,882 children).
- 36.0% of children living in absolute low-income families are aged 5 to 10.
- 64.6% of children living in absolute low-income families in Kent live in a family where at least one adult is working.
- 17.5% of children aged under 16 are living in relative low-income families in Kent (54,002 children), 36.5% of which are aged 5 to 10.
- 65.5% of children living in relative low-income families in Kent live in a family where at least one adult is working.
- An estimated 4.0% of children in Kent are living in workless households in 2023.
- All of the top 20 most deprived areas in Kent are in coastal areas according to the Income Deprivation Affecting Children Index (IMD2019).

Introduction

There is no single definitive measure of child poverty. This bulletin looks at several measures focusing on child poverty and deprivation. Data is presented for the Kent County Council area and provides national and regional comparisons where available.

Children in low-income families

The Children in low-income families statistics (CiLIF), provide information on the number and proportion of children living in Relative and Absolute low income before housing costs by local area across Great Britain.

From 2019/20 CiLIF statistics are drawn from a new database "RAPID" (Registration and Population Interaction Database) which provides a single coherent view of citizens' interactions with DWP and HMRC within a tax year for the UK.

The CiLIF measure looks at the number of children in families (not households), where the income is less than 60% of median income before housing costs in both absolute and relative terms. For both measures a family must have claimed one or more of Universal Credit, Tax Credits or Housing Benefit at any point in the year to be classed as low income in these statistics.

Absolute low income is defined as a family in low income before housing costs in the reference year, in comparison with incomes in 2010/11.

Relative low income is defined as a family in low income before housing costs in the reference year.

Background information and the methodology of how the CiLIF are calculated is available from the [Department for Work and Pensions](https://www.gov.uk/government/organisations/department-for-work-and-pensions) on Gov.uk.

The number of children in an area is taken from the Office for National Statistics Mid-Year Population Estimates.

The latest data is for 2023/24. This is provisional and therefore subject to revision.

Children in workless households

The Annual Population Survey (APS) from the Office for National Statistics releases an annual dataset looking at households by economic activity status. The APS is a labour force based survey. Due to the sample size figures for districts are statistically unreliable. Figures at county level and above are generally more reliable.

This dataset presents an estimate of the number of households where no individuals aged 16 and over are in employment and have dependent children.

The latest data is for 2023.

English Indices of Deprivation 2019 (source: MHCLG)

The English Indices of Deprivation from the Ministry of Housing, Communities and Local Government (now called Department for Levelling Up, Housing and Communities) measure relative levels of deprivation in 32,844 small areas or neighbourhoods, called Lower-layer Super Output Areas, in England.

The English Indices of Deprivation combines information from seven domain indices (which measure different types or dimensions of deprivation) to produce an overall relative measure of deprivation. The domain indices can be used on their own to focus on specific aspects of deprivation.

Among the seven domains is The Education, Skills, and Training Deprivation Domain. This measures the lack of attainment and skills in the local population. The indicators fall into two sub-domains: one relating to children and young people and one relating to adult skills.

In addition to the seven domain indices The English Indices of Deprivation also contain supplementary indices concerned with income deprivation among children (IDACI) and older people (IDAOPI).

The income deprivation affecting children index (IDACI) measures the proportion of all children aged 0 to 15 living in income deprived families. It is a subset of the Income Deprivation Domain which measures the proportion of the population in an area experiencing deprivation relating to low income. The definition of low income used includes both those people that are out-of-work, and those that are in work but who have low earnings (and who satisfy the respective means tests).

Further information on the [Ministry of Housing, Communities and Local Government](#) webpages can be found.

Children in Low-income Families

The Children in Low-income Families measure (CiLIF) looks at the number of children in families, where the income is less than 60% of median income before housing costs, in both absolute and relative terms. For both measures a family must have claimed one or more of Universal Credit, Tax Credits or Housing Benefit at any point in the year to be classed as low income in these statistics.

In 2023/24 the average (median) household income before housing costs was £650.00 per week (around £34,000 per year). 60% of the median income equates to £390.00 per week (around £20,300 per year).

Percentages are calculated using the number of children aged under 16 using the Mid-Year Population Estimates from the Office for National Statistics (ONS).

Children (Aged Under 16) living in absolute low-income families

Absolute low income is defined as a family in low income before housing costs in the reference year, in comparison with incomes in 2010/11. The latest figures for the year 2023/24 are provisional and liable to revision.

In 2023/24, 45,882 children under 16 in Kent are living in absolute low-income families. This is equivalent to 14.8% of the children in the county. While this is below the national level (19.1%) it is higher than the average for the South East Region (12.3%).

Three of the local authorities in Kent are above or the same as the national average of 19.1%: Thanet (22.1%), Dover (19.5%), and Folkestone & Hythe (19.1%).

Thanet district has the highest number and proportion of children living in absolute low-income families in Kent (5,580, 22.1%). Swale has the second highest number (5,023, 16.3%). Almost 2 in 5 children living in absolute low-income families in Kent live in either Thanet or Swale.

Overall, in Kent, the number of children living in absolute low-income families has risen by 9.7% since the previous year. This is a smaller increase than seen in the South East region and England (both 10.4%).

All Kent districts saw a rise in the number of children living in absolute low-income families. Thanet saw the highest rise (13.6%) and Sevenoaks saw the lowest (3.1%).

Thanet district saw the biggest rise in number with 667 more children living in absolute low-income families than the previous year, followed by Maidstone with 440 more children. As well as the smallest percentage increase, Sevenoaks saw the smallest rise in number with 74 more children.

Table 1: Children in absolute low-income families

2023/24	Total children aged under 16	Number Living in Absolute Low Income Families	% Living in Absolute Low Income Families	1-year number change	1-year % change

Chart 1 (overleaf) shows the percentage of children in absolute low-income families in Kent districts compared to other authorities in the South East.

Thanet has the second highest proportion of children living in absolute low-income families in the South East. Dover and Folkestone & Hythe have the 6th and 8th highest respectively out of the 64 local authorities in the region.

Overall, the proportion of children living in absolute low-income families in the South East region is 12.3%. All local authorities in Kent are above the South East rate except for Tonbridge & Malling (10.7%), Sevenoaks (10.3%) and Tunbridge Wells (9.7%).

A table showing the number and proportion of children living in absolute low-income families in all South East local authorities can be found in table 27 in the Annex at the end of this bulletin.

Children in absolute low-income families data is also available at ward level.

Map 1 shows the proportion of children aged under 16 living in absolute low-income families.

Map 1: Percentage of children living in absolute low-income families

The highest proportions of children living in absolute low-income families tends to be in the east of the county and in the coastal areas. There are some areas of the highest density in Dartford and Gravesham and the north of Sevenoaks. Tunbridge Wells has no areas of the highest density.

Table 3 shows the number of wards in each district within each Kent quintile.

More than half (60%) of the wards in Thanet are within the 20% of wards in Kent with the highest proportion of children in absolute low-income families (those where 18.9% or more children are in absolute low-income families). Tunbridge Wells is the only district that has no wards within the highest 20%.

Half the wards in Sevenoaks and Tunbridge Wells are within the 20% in Kent with the smallest proportion of children in absolute low-income families (8.6% or less).

Table 3: Number of wards within Kent quintiles in each district

2023/24	20% lowest children in absolute low income families	20-40%	40-60%	60-80%	20% highest children in absolute low income families	Total number of wards

The top ten wards in Kent with the highest proportion of children living in absolute low-income families are shown in table 4 overleaf. Town and Castle ward in Dover has the highest proportion of children living in low-income families (29.7%). Nine of the top ten wards are within coastal districts.

The top ten wards in Kent with highest number of children living in absolute low-income families are shown in table 5 overleaf. Sheerness ward in Swale has the highest number of children living in absolute low-income families (870).

Table 4: Top ten wards in Kent with highest percentage children in absolute low-income families, 2023/24

Children in absolute low-income families by age

It is possible to look at children in absolute low-income families by age group.

14.0% of children in Kent aged 5-10 are living in absolute low-income families and account for the biggest proportion (36.0%) of all children in absolute low-income families in Kent. This varies across Kent authorities. In Ashford, Dover, Swale and Tunbridge Wells a higher proportion of children in absolute low-income families are aged 0 to 4 than any other age group.

In all other districts, a higher proportion are aged 11 to 15 than any other age group. In Canterbury, both children aged 0 to 4 and 11 to 15 have the highest proportions.

Chart 2 shows the proportion of children living in absolute low-income families in Kent by age group.

Chart 2: Children living in absolute low-income families: Age Group

Proportion of children in absolute low income families in Kent by age group, 2023/24

Source: DWP Stat Xplore; ONS MYPE
Presented by: Kent Analytics, Kent County Council

Thanet has the highest number and proportion of children in all age groups living in absolute low-income families.

Sevenoaks has the lowest number and proportion of children in absolute low-income families ages 0-4. Tunbridge Wells has the lowest number and proportion of children ages 5-10 and 11-15.

Table 6 shows the proportion of children living in absolute low-income families in Kent local authorities by age group.

Presented by: Kent Analytics, Kent County Council

Since the previous year the number of children aged 0-4 living in absolute low-income families grew in all Kent local authorities apart from Sevenoaks (-24). Thanet has the largest increase of 117.

The 5-10 and 11-15 age groups saw an increase in children living in absolute low-income families in all Kent local authorities. Thanet again had the largest increases with 277 more children aged 5-10 and 276 more children aged 11-15. This can be seen in table 7 overleaf.

Table 7: Change in children in absolute low-income families: Age group

	Number change 0 - 4	Number change 5 - 10	Number change 11 - 15	% change 0 - 4	% change 5 - 10	% change 11 - 15

Thanet district has the highest number and proportion of children living in relative low-income families in Kent (6,639 children, 26.3%).

Tunbridge Wells has the lowest number and proportion of children living in relative low-income families in 2023/24 (2,640, 11.3%).

All Kent districts saw an increase in the number of children living in relative low-income families except in Sevenoaks. The biggest number and percentage increase was in Thanet with 429 more children in relative low-income families than the previous year, a rise of 6.9%. Sevenoaks saw a decrease of 27 fewer children (-0.9%).

Chart 5 overleaf shows the percentage of children in relative low-income families in Kent districts compared to other authorities in the South East.

Thanet has the second highest proportion of children in relative low-income families in the region. Dover and Folkestone & Hythe have the 6th and 8th highest proportions out of the 64 local authorities in the region.

Eleven Kent authorities have a higher proportion of children in relative low-income families than the South East average of 14.5%. Tunbridge Wells is slightly lower than the regional average at 14.1%.

A table of the number and proportion of children living in relative low-income families in all South East local authorities can be found in table 28 in the Annex at the end of this bulletin.

Chart 5: Children in relative low-income families in local authorities in the South East

Children in relative low-income families data is also available at ward level.

Map 2 shows the proportion of children aged under 16 in relative low-income families in Kent wards.

Map 2: Percentage of children living in relative low-income families

The highest proportions of children living in relative low-income families tend to be in the east and north of the county, however all local authorities except Tunbridge Wells have some areas with the high proportions of children living in relative low-income families.

Table 13 shows the number of wards in each district within each Kent quintile.

13 of the 23 of the wards in Thanet are within the 20% of wards in Kent with the highest proportion of children in relative low-income families (those where 22.4% or more children are in relative low-income families). Tunbridge Wells has no wards within the highest 20%.

Around half the wards in Sevenoaks and Tunbridge Wells are within the 20% in Kent with the smallest proportion of children in relative low-income families (10.5% or less). Folkestone & Hythe has no wards within the lowest 20%.

Table 13: Number of wards within Kent quintiles in each district

Children in relative low-income families by age

It is possible to look at children in relative low-income families by age group.

A higher proportion of children in relative low-income households in Kent are aged 5-10, accounting for 36.5% of children in relative low-income families.

Chart 6 shows the proportion of children living in relative low-income families in Kent by age group.

Chart 6: Children living in relative low-income families: Age Group

Proportion of children in relative low income families in Kent by age group, 2023/24

Source: DWP Stat Xplore; ONS MYPE
Presented by: Kent Analytics, Kent County Council

For all the age groups (0-4, 5-10 and 11-15) in Kent, the proportion is below the national rate.

Thanet has the highest proportion of children in all age groups living in relative low-income families, more than a quarter of the children in all age groups.

Sevenoaks has the lowest proportion of 0-4 year olds living in relative low-income families (11.0%) and Tunbridge Wells has the lowest proportion of 5-10 (10.7%) and 11-15 year olds (11.5%).

Table 16 shows the proportion of children living in relative low-income families in Kent local authorities by age group.

Table 16: Children in relative low-income families: Age group

2023/24	0 - 4	5 - 10	11 - 15	% of all children aged 0 - 4	% of all children aged 5 - 10	% of all children aged 11 - 15

Since the previous year, the number of children in Kent overall aged 0-4 living in relative low-income families has fallen (-48). Those aged 5-10 and 11-15 in Kent living in relative low-income families has increased (+800 and +1,302 respectively).

Half of the twelve Kent districts saw an increase in the number of children aged 0-4 living in relative low-income families whereas six Kent districts saw a fall. Ten Kent districts saw a rise in children aged 5-10 except Sevenoaks (-30) and Tunbridge Wells (-6).

All Kent districts saw a rise in the number of children aged 11-15 except Ashford (-14). This can be seen in table 17 overleaf.

Children in relative low-income families: Family Characteristics

Children who are living in poverty are more likely to be living in lone parent households.

Chart 7 overleaf shows that in Kent 55.4% of children in relative low-income families are living in a lone parent household, above the national average of 51.8%.

Chart 7: Children in relative low-income families in Kent: Family Type

Table 18 overleaf shows the equivalent statistics for each Kent district.

Thanet has the highest number of children in relative low-income families living in couple families (3,140) while Canterbury has the highest percentage (48.0%).

Thanet (3,504), and Swale (3,422) have the highest number of children in relative low-income families living in lone parent families in Kent.

Dartford has the highest proportion living with a lone parent (61.4%) while Canterbury has the lowest proportion (52.1%).

Table 18: Children in relative low-income families: Family Type

Table 19 overleaf shows the proportion of children in relative low-income families by family work status in Kent local authorities.

Thanet has the highest number of children living in relative low-income families that are in work (4,375). Tunbridge Wells has the largest proportion (69.8%).

Swale has the highest number and proportion in out of work families (2,262, 37.5%).

The number of children in Kent living in relative low-income families where at least one adult was in work increased by 3,407 (+10.7%) over the previous year, while those living in out of work families fell by 1,351 (-6.8%).

The number of children living in relative low-income families where at least one adult was in work increased in all Kent districts. The biggest increase in number was in Thanet where there are 525 more children in working families while Dover has seen the greatest percentage increase (13.8%).

The number of children living in relative low-income families where no adult was in work fell in all Kent districts. The biggest decrease was in Sevenoaks where there are 203 fewer children in relative low-income out of work families (-16.7%).

Workless Households with dependent children

Data from the Annual Population Survey shows the number of households with dependent children where no adult is in work. Due to the survey sample size, figures for districts are statistically unreliable. Figures at county level and above are, for the most part, generally more reliable.

It is estimated that in 2023, 4.8% of households with dependent children in Kent have no adult in work, which is equal to the proportion the year before. When compared to the South East region (4.7%) and England (8.5%) a slightly higher proportion of households in Kent are workless with children than regionally though a lower proportion than nationally. This is shown in table 21.

Table 21: Workless households with dependent children

Workless households with dependent children	Kent	South East	England	Kent %	South East %	England%
2004	16,200	82,000	827,200	9.6%	8.3%	13.5%

English Indices of Deprivation 2019

The English Indices of Deprivation, published by the Ministry for Housing, Communities and Local Government (MHCLG), combines information from seven domain indices (which measure different types or dimensions of deprivation) to produce an overall relative measure of deprivation. The domain indices can be used on their own to focus on specific aspects of deprivation.

The Income Deprivation Affecting Children Index

In addition to the seven domain indices The English Indices of Deprivation also contain supplementary indices concerned with income deprivation among children (IDACI).

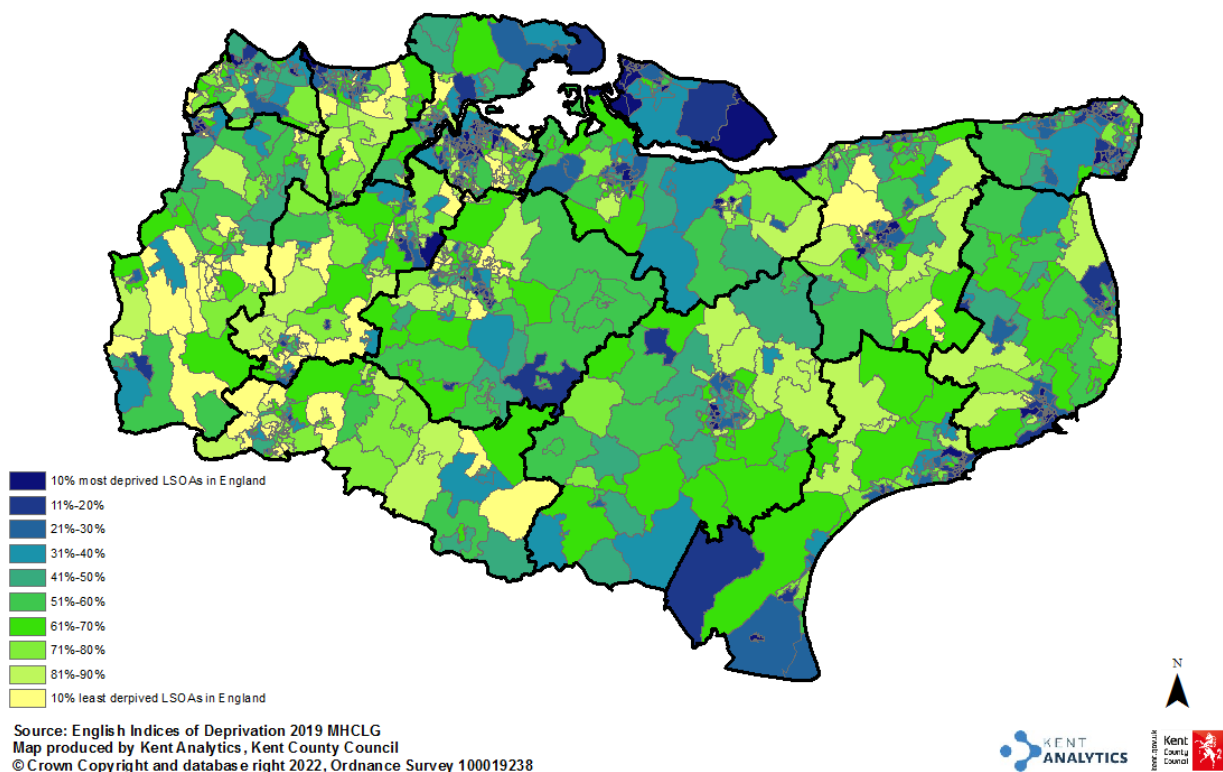

The IDACI measures the proportion of all children aged 0 to 15 living in income deprived families. It is a subset of the Income Deprivation Domain which measures the proportion of the population in an area experiencing deprivation relating to low income. The definition of low income used includes both those people that are out-of-work, and those that are in work but who have low earnings (and who satisfy the respective means tests).

The Index shows the proportion of children in each Lower-layer Super Output Area (LSOA) that live in families that are income deprived; those that are in receipt of Income Support, income-based Jobseeker's Allowance, Pension Credit Guarantee or Child Tax Credit below a given threshold.

Each LSOA is given a score and that score is then ranked against all 32,844 LSOAs nationally. The national rank of Kent LSOAs for the IDACI is presented in Map 3.

Map 3: IDACI (ID 2019): National rank of Kent & Medway LSOAs

Indices of Deprivation 2019 (ID2019): (IDACI) - Income Deprivation Affecting Children Index
National Rank of LSOAs in Kent & Medway

The IDACI scores are rates so can be interpreted as the proportion of the relevant population that is 'income deprived'. For example, a score of 0.24 on the Income Deprivation Affecting Children Index would mean that 24% of children in the area live in income-deprived families.

Table 23 shows the top twenty most deprived areas within the Kent County Council area according to the IDACI. All are within coastal areas, particularly in Swale, Thanet, and Folkestone & Hythe, and all are within the top 10% most deprived in the country.

The most deprived area in Kent according to the IDACI is within Sheerness ward in Swale with a score of 0.54 which equates to 54% of children in that area live in income deprived families.

Table 23: IDACI (ID2019): top 20 most deprived areas in Kent

LSOA name	Ward	Local Authority	IDACI Score	National rank out of 32,844 LSOAs	Within top 10% most deprived in England	IDACI Kent rank out of 902 LSOAs
Swale 001A	Sheerness	Swale	0.539	152	Yes	1

Swale 001C	Sheerness	Swale	0.423	1,058	Yes	18
Dover 012F	Castle	Dover	0.416	1,180	Yes	19
Shepway 014C	Folkestone Central	Folkestone & Hythe	0.412	1,234	Yes	20

Shepway local authority changed name to Folkestone & Hythe in 2018 but the LSOAs are still named Shepway

The MHCLG does not publish ward level figures as an additional output.

Lower-layer Super Output Areas are a more suitable small area geography than wards for measuring relative deprivation. Wards are much larger than Lower-layer Super Output Areas, vary greatly in size and are prone to regular boundary changes, making them

unsuitable as a unit of analysis or for identifying pockets of deprivation. It is, however, possible to calculate ward scores by following MHCLG guidance.

To create an average score for each ward the IMD score is first multiplied by the LSOA population for each LSOA within the ward. These totals are summed and then divided by the population of the ward to create the average score for that ward. The scores are then ranked against all 283 2015 Wards in Kent.

The top 10 most deprived wards in Kent according to the IDACI are presented in table 24.

Table 24: IDACI: Calculated Ward ranks for 2015 wards in Kent (Excluding Medway)

2015 Ward Name	Local Authority	KCC Rank (out of 268 wards)
Newington	Thanet	1

Education, Skills, and Training Deprivation

Within the main English Indices of Deprivation one of the seven domains is The Education, Skills, and Training Deprivation Domain. This measures the lack of attainment and skills in the local population.

The indicator falls into two sub-domains: one relating to children and young people and one relating to adult skills. These two sub-domains are designed to reflect the 'flow' and 'stock' of educational disadvantage within an area respectively. That is, the 'children and young people' sub-domain measures the attainment of qualifications and associated measures ('flow'), while the 'skills' sub-domain measures the lack of qualifications in the resident working age adult population ('stock').

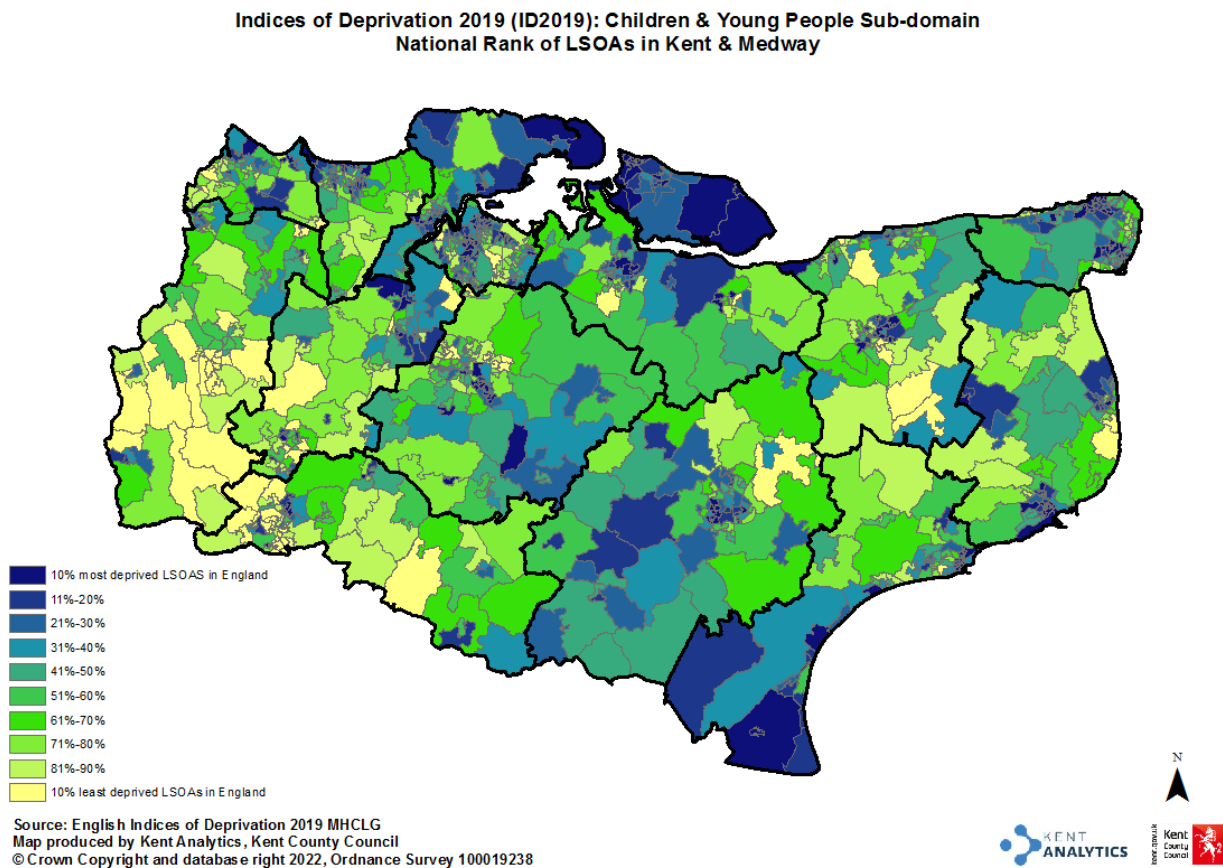

The children and young people sub-domain creates a score based upon:

- **Key Stage 2 attainment:** The average points score of pupils taking reading, writing and mathematics Key Stage 2 exams¹²
- **Key Stage 4 attainment:** The average capped points score of pupils taking Key Stage 4
- **Secondary school absence:** The proportion of authorised and unauthorised absences from secondary school
- **Staying on in education post 16:** The proportion of young people not staying on in school or non-advanced education above age 16
- **Entry to higher education:** A measure of young people aged under 21 not entering higher education.

Each LSOA is given a score and that score is then ranked against all 32,844 LSOAs nationally.

The national rank of Kent LSOAs for the children and young people sub-domain of education, skills and training is presented in Map 4.

Map 4: Children & young people sub-domain: National rank of Kent & Medway LSOAs

15 of the top 20 most deprived areas in Kent, according to the children and young people sub-domain of education, skills, and training, are in coastal areas of the county.

The most deprived area in Kent according to this sub-domain is in Cliftonville West ward in Thanet. Nationally it is ranked as the 5th most deprived area in the country.

Table 25 (overleaf) shows the top twenty most deprived areas in Kent based upon the children and young people sub-domain of education, skills, and training.

Table 25: Children & young people sub-domain of Education, Skills & Training: top 20 most deprived areas in Kent

Lower Super output Area	2015 Ward	Local Authority	Children and Young People Sub-domain Score	National Rank out of 32,844 LSOAs	Kent rank out of 902 LSOAs
	Cliftonville				
Thanet 001A	West	Thanet	2.736	5	1
Swale 006A	Sheppey East	Swale	2.419	18	2
	Cliftonville

Swale 002C	Sheerness	Swale	2.102	89	4
Swale 001A	Sheerness	Swale	2.098	90	5
Swale 002A	Sheerness	Swale	2.089	97	6
	Sheppey				
Swale 004E	Central	Swale	2.077	100	7
Swale 002B	Sheerness	Swale	2.044	110	8
Swale 006B	Sheppey East	Swale	2.005	133	9
	Queenborough				
Swale 005C	and Halfway	Swale	2.003	134	10
Maidstone 013B	Park Wood	Maidstone	2.002	137	11
	Margate				
Thanet 001E	Central	Thanet	1.974	157	12
Ashford 008C	Stanhope	Ashford	1.952	176	13
Swale 010C	Murston	Swale	1.944	186	14
	Shepway				
Maidstone 013C	North	Maidstone	1.898	219	15
Tonbridge and		Tonbridge &			
Malling 003A	East Malling	Malling	1.891	231	16
Swale 001B	Sheerness	Swale	1.853	269	17
Tonbridge and		Tonbridge &			
Malling 009C	Trench	Malling	1.85	274	18
Canterbury 014C	Northgate	Canterbury	1.832	288	19
	Folkestone	Folkestone &			
Shepway 014A	Harbour	Hythe	1.824	299	20

Shepway local authority changed name to Folkestone & Hythe in 2018 but the LSOAs are still named Shepway

As with the IDACI it is possible to calculate ward level deprivation for the children & young people sub-domain following the DCLG guidelines.

The top 10 most deprived wards in Kent according to the children & young people sub domain are presented in table 26 (overleaf).

**Table 26: Children & young people sub-domain of Education, Skills & Training:
Calculated 2011 Census Ward ranks in Kent (excluding Medway)**

2015 Ward Name	Local Authority	KCC Rank (out of 268 wards)
Cliftonville West	Thanet	1
Sheerness	Swale	2
Stanhope	Ashford	3
Sheppey East	Swale	4
Margate Central	Thanet	5
Park Wood	Maidstone	6
Town & Pier	Dover	7
Northgate	Canterbury	8
Tower Hamlets	Dover	9
Newington	Thanet	10
