Published by the Kent Resource Partnership on behalf of the following KRP constituent councils:-

Ashford BC, Canterbury CC, Dartford BC, Dover DC, Folkestone & Hythe DC, Gravesham BC, Kent CC, Maidstone BC, Sevenoaks DC, Swale BC, Thanet DC, Tonbridge & Malling BC and Tunbridge Wells BC.

Information in this publication may be used without charge and without licence subject to the original context for information being maintained and the KRP accredited as the source.

Publication Date: July 2020

© Copyright 2021 of Kent County Council on behalf of the Kent Resource Partnership

Important: all data in this publication is derived from three main sources as follows: -

- Kent County Council is the primary source for tonnage information and residual waste destinations.*
- Waste Data Flow in terms of summary information on data input by the 13 councils.*
- Waste management companies in relation to countries of end destinations.*

The Kent Resource Partnership staff are entirely reliant on these sources and do not, and can not, produce original data themselves.

NOTE 1

This publication provides information on the total municipal waste in the Kent CC authority area. This includes waste (both recycled and non-recycled) that is not classified as household waste; either because it was collected as part of a commercial waste operation or because the material is not currently considered as household waste (even though it derived from a household) e.g. plasterboard, soil, rubble etc. Therefore Kent's household waste sent for reuse, recycling or composting (Ex NI192) of 46.7% (as validated by Defra's latest statistics), is calculated using a subset of the total tonnage data provided within this publication.

NOTE 2

For this financial year, some dry-recycling tonnage from the 13 Kent councils was processed through Materials Recycling Facilities (MRFs) or with companies who may send their feedstocks abroad (e.g. wood for biomass). The KRP thanks Viridor Waste Kent Ltd and Veolia ES Cleanaway (UK) Ltd for the provision of information to us about the countries of end destination of their outputs. The KRP is very grateful for the co-operation shown.

NOTE 3

On the basis of industry experience for tonnages via charities, we have allocated tonnages 'abroad'. This includes items (e.g. clothes) that are collected by UK based charities and re-used by people in other countries.

NOTE 4

Waste Data Flow publishes information for 'Kent County Council' even though this is an amalgamation of all 13 Kent councils' information. Thus, the information for Kent Resource Partnership on pages 5 to 14 also incorporates all tonnages for Kent County Council.

Note 5

Every effort has been made to ensure the figures in this publication are correct. However, as the figures are based heavily on information from the national Waste Data Flow system, factors that impact on calculations are very likely to be replicated in this publication. Additionally, if the publication includes an inadvertent error, we would be pleased to be advised. In the first instance, please contact the KRP Projects Officer, Kate Morris by email at: kate.morris@kent.gov.uk

Foreword

*Cllr Nicholas Kenton
Chairman of KRP &
Cabinet Member for Planning & Regulatory Services,
Dover DC*

*Cllr Robin Betts
Vice-Chairman of the KRP &
Cabinet Member for Street Scene & Environment Services,
Tonbridge and Malling BC*

On behalf of the Kent Resource Partnership (KRP), we are pleased to share our Materials End Destinations Publication for 2019/20. This publication provides details as to what happens to Kent's recycling & waste once it is collected. The total municipal waste collected by the 13 Kent Councils in 2019/20 was 685,300.00 tonnes a reduction of 3.68% from the previous year.

It is our ambition to process all of Kent's waste and recycling entirely in Kent. In 2019/20 we processed just over 75% of Kent's waste and recycling here in Kent. As a partnership we are working with external partners to increase that figure every year until we reach our ambition. In 2019/20 we sent just 7.4% of our waste and recycling abroad.

As a result of our abroad figure reducing we sent more waste and recycling to be processed here in the UK. With just over 16% of our waste and recycling being processed in other locations in the UK outside of Kent. Reducing the distance our waste travels will reduce the emissions created and contribute to Kent reaching its goal of becoming carbon neutral.

Another top priority of the partnership due to the environmental benefits is landfill avoidance. Landfill is only used in Kent as a last resort, for example, asbestos that cannot be disposed of safely in any other way. In 2019/20 we sent 1.5% of all waste and recycling in Kent to landfill. This is a decrease of 0.20 percentage points compared to the previous year.

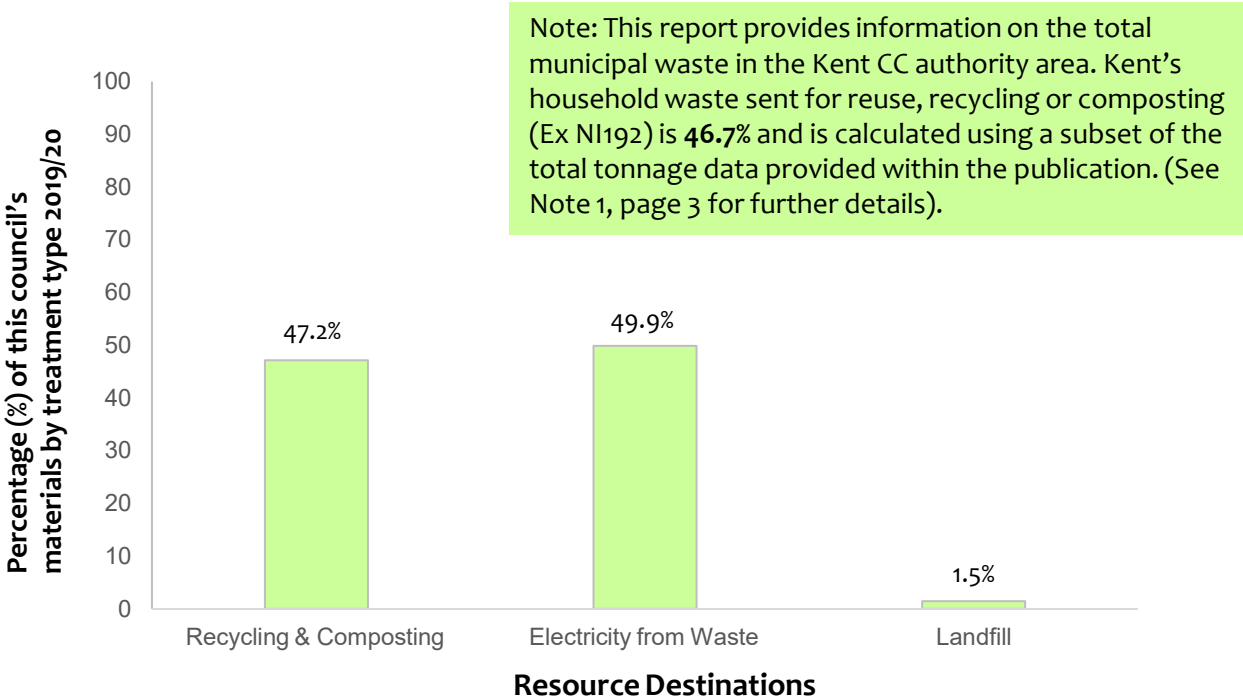

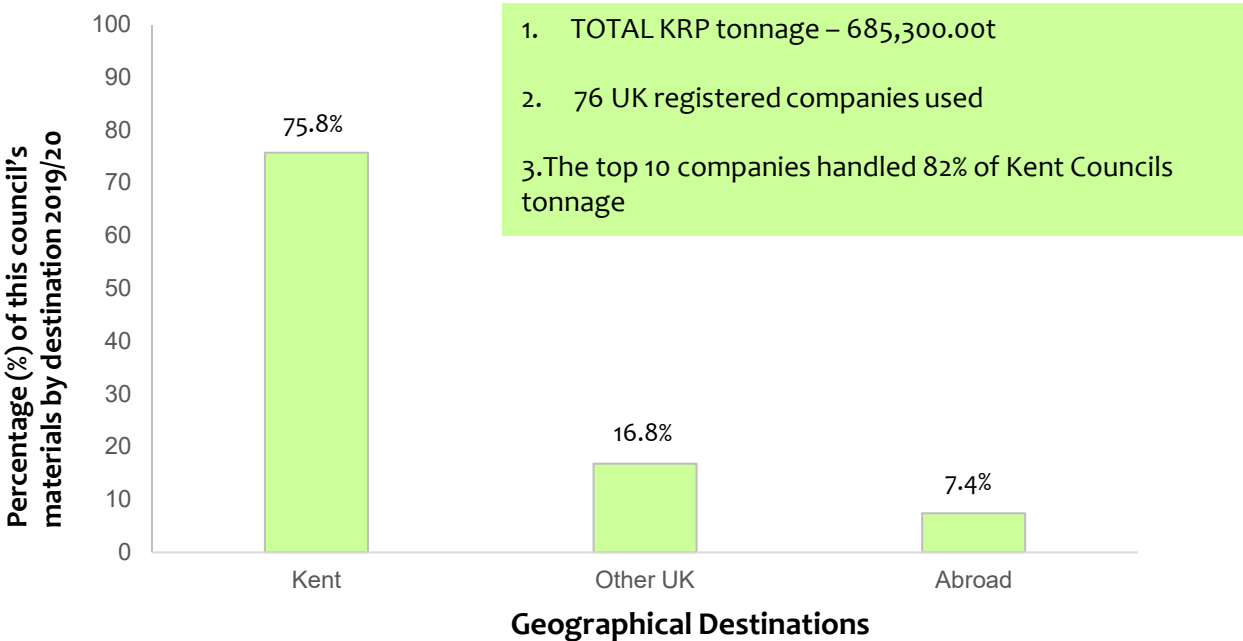

We recycled and composted 46.7% in 2019/20 and as a partnership we are committed to improving our recycling rate and we have delivered numerous Kent-wide recycling campaigns throughout the year. There has been a shift in the focus of our communications with more campaigns focusing on waste minimisation. For example, our 'Kent Remember Your Reusable' campaign which was delivered in February 2020. This shift in priority follows the waste hierarchy, with reduce and reuse being on top.

We would like to thank the KRP's Manager, Paldeep Bhatti, and Projects Officer, Kate Morris, as well as, Kent County Council's, Nichola Hood, Ben Frier and Kim Bishop, for their valuable work to produce this publication. We are also grateful for the continued co-operation from waste management companies Veolia, and Viridor. We believe openness and transparency about where our waste goes helps Kent councils maintain public confidence in their acclaimed waste services.

Kent Resource Partnership

The bar charts below represent the KRP’s tonnage in terms of its geographical destinations (Kent, other UK or abroad) and resource destination (recycling & composting, electricity from waste & landfill) respectively.

Further details are provided overleaf.

Kent Resource Partnership: Contractor Details

The following information has been sourced, as best as possible and practicable, from Waste Data Flow and waste management companies. On pages 5 to 15, the ‘Kent Resource Partnership’ should be taken as referring to ‘Kent County Council’ on Waste Data Flow listings. (See Note 1 on page 4 for further details)

Every effort has been made to ensure the accuracy of details throughout the publication.
