Legend

Study Area

TDC Administrative Boundary

Susceptibility to Groundwater Flooding

Very High; $\geq 75\%$

High; $\geq 50\% < 75\%$

Moderate; $\geq 25\% < 50\%$

Low; $< 25\%$

Notes

This susceptibility data is suitable for use for regional or national planning purposes where the groundwater flooding information will be used along with a range of other relevant information to inform land-use planning decisions. The susceptibility data should not be used on its own to make planning decisions at any scale, and, in particular, should not be used to inform planning decisions at the site scale. The susceptibility data cannot be used on its own to indicate risk of groundwater flooding.
