Published by the Kent Resource Partnership on behalf of the following KRP constituent councils:-

Ashford BC, Canterbury CC, Dartford BC, Dover DC, Folkestone & Hythe DC, Gravesham BC, Kent CC, Maidstone BC, Sevenoaks DC, Swale BC, Thanet DC, Tonbridge & Malling BC and Tunbridge Wells BC.

Information in this publication may be used without charge and without licence subject to the original context for information being maintained and the KRP accredited as the source.

Publication Date: March 2020

© Copyright 2020 of Sevenoaks District Council on behalf of the Kent Resource Partnership

Important: all data in this publication is derived from three main sources as follows: -

- *Kent County Council is the primary source for tonnage information and residual waste destinations.*
- *Waste Data Flow in terms of summary information on data input by the 13 councils.*
- *Waste management companies in relation to countries of end destinations.*

The Kent Resource Partnership staff are entirely reliant on these sources and do not, and can not, produce original data themselves.

NOTE 1

This publication provides information on the total municipal waste in the Kent CC authority area. This includes waste (both recycled and non-recycled) that is not classified as household waste; either because it was collected as part of a commercial waste operation or because the material is not currently considered as household waste (even though it derived from a household) e.g. plasterboard, soil, rubble etc. Therefore Kent's household waste sent for reuse, recycling or composting (Ex NI192) of 47.2% (as validated by Defra's latest statistics), is calculated using a subset of the total tonnage data provided within this publication.

NOTE 2

For this financial year, some dry-recycling tonnage from the 13 Kent councils was processed through Materials Recycling Facilities (MRFs) or with companies who may send their feedstocks abroad (e.g. wood for biomass). The KRP thanks Viridor Waste Kent Ltd, Veolia ES Cleanaway (UK) Ltd and Countrystyle Recycling Ltd for the provision of information to us about the countries of end destination of their outputs. The KRP is very grateful for the co-operation shown.

NOTE 3

On the basis of industry experience for tonnages via charities, we have allocated tonnages 'abroad'. This includes items (e.g. clothes) that are collected by UK based charities and re-used by people in other countries.

NOTE 4

Waste Data Flow publishes information for 'Kent County Council' even though this is an amalgamation of all 13 Kent councils' information. Thus, the information for Kent Resource Partnership on pages 5 to 15 also incorporates all tonnages for Kent County Council.

Note 5

Every effort has been made to ensure the figures in this publication are correct. However, as the figures are based heavily on information from the national Waste Data Flow system, factors that impact on calculations are very likely to be replicated in this publication. Additionally, if the publication includes an inadvertent error, we would be pleased to be advised. In the first instance, please contact the KRP Manager, Paldeep Bhatti by email at: paldeep.bhatti@kentrp.org.uk

Foreword

*Cllr Nicholas Kenton
Chairman of KRP &
Cabinet Member for Planning & Regulatory Services,
Dover DC*

*Cllr Andrew Buchanan
Vice-Chairman of the KRP &
Cabinet Member for Environment & Land Management,
Ashford BC*

On behalf of the Kent Resource Partnership (KRP), we are pleased to share our Materials End Destinations Publication for 2018/19. This publication provides details as to what happens to Kent's recycling & waste once it leaves the doorstep, with a particular focus on where materials are reprocessed.

The total municipal waste collected by the 13 Kent Councils in 2018/19 was just over 711,000 tonnes. Of this 76.2% was reprocessed in Kent. This reduces the carbon impact of reprocessing the materials as it does not have to travel far. Just over 14% is processed in the rest of the UK with just under 10% sent abroad.

One of the KRP's objectives is to send no more than 2% of waste collected to landfill and in 2018/19 we surpassed this target with only 1.7% ending up at landfill. Landfill avoidance is an important part of the partnerships strategy to ensure carbon reduction. This has been achieved with regular communications campaigns, along with the County Council's disposal contracts which sees non recyclable waste sent to generate energy locally. However, we have seen a slight increase in the landfill rate from the previous year. This is due to essential maintenance work carried out in March 2019 at the local energy from waste plant, resulting in its temporary closure.

Also one of our highest priorities is reducing waste and increasing recycling. In 2018/19, Kent's recycling performance was 47.2%. This is an increase of 0.5 percentage points from the previous year. The KRP continue to work together to improve recycling performance year-on-year.

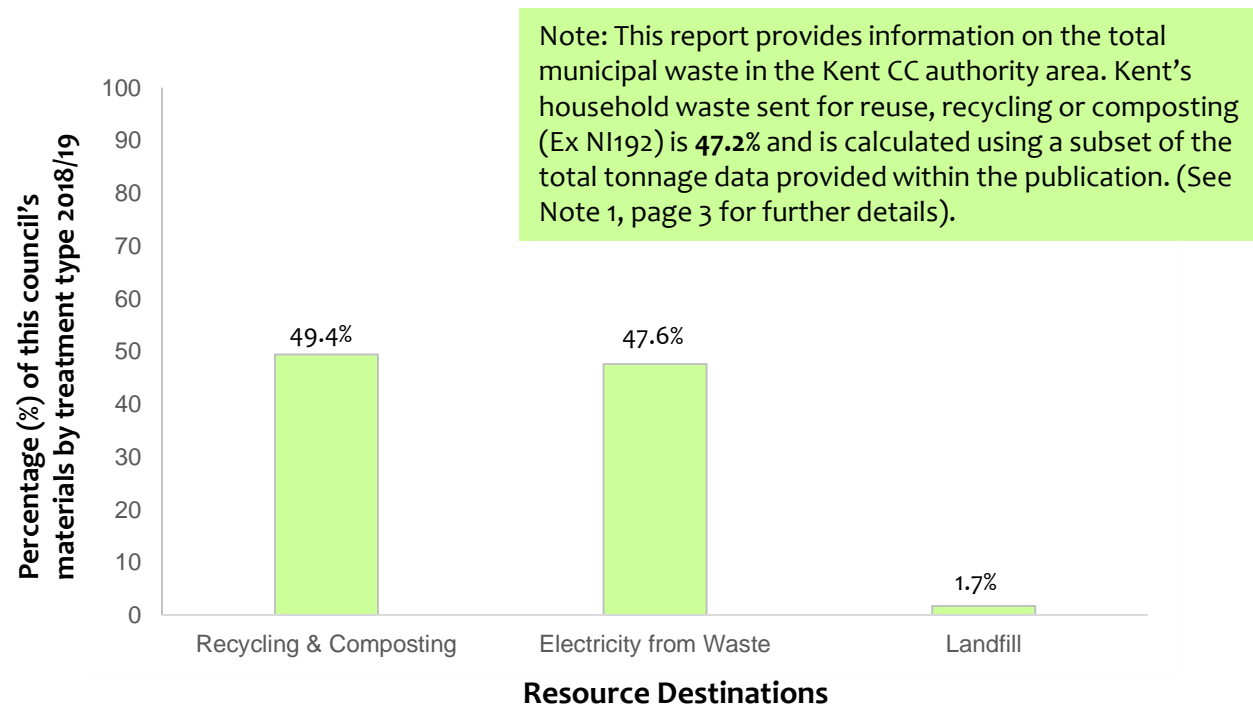

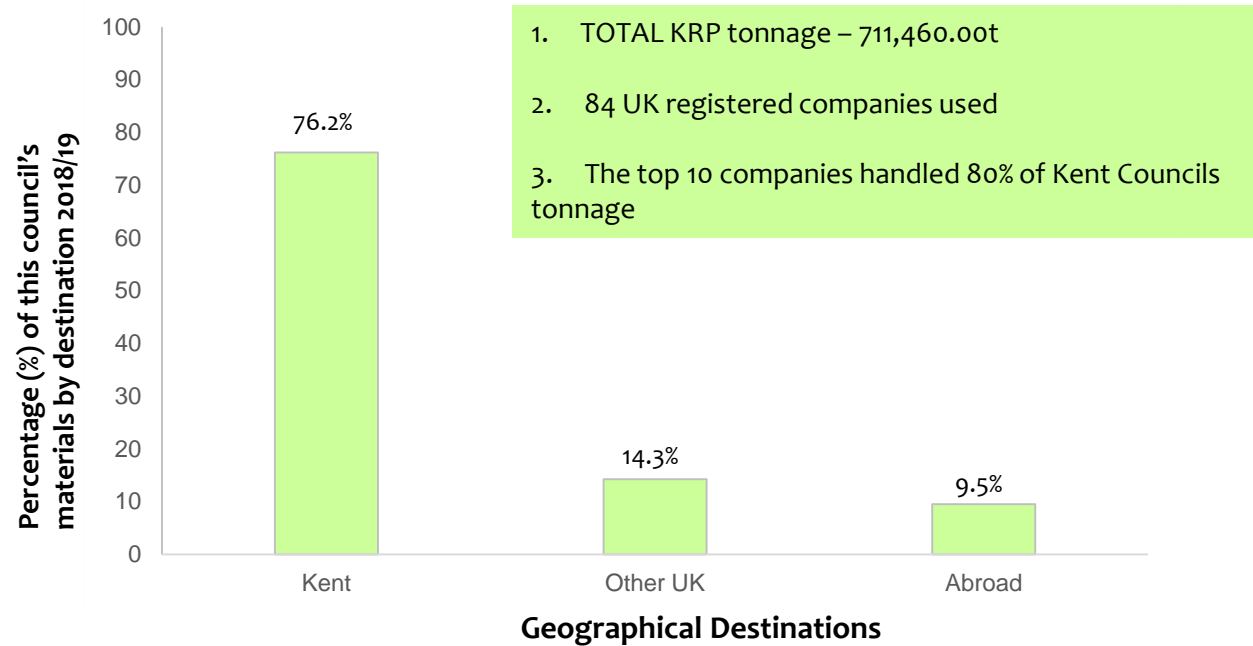

The 13 Kent councils recognize residents welcome this level of detail. With this in mind, there will be a series of short recycling videos which will reflect what happens to each material (e.g. plastics, metals, glass, paper/card) after leaving the doorstep – these videos will be available later this year on councils' websites and social media channels.

Lastly, we would also like to take this opportunity to thank the KRP's Manager, Paldeep Bhatti, and Projects Officer, Kate McCall, as well as, Kent County Council's, Nichola Hood and Ben Frier, for their valuable work to produce this publication. We are also grateful for the continued co-operation from waste management companies Countrystyle, Veolia, and Viridor. We believe openness and transparency about where our waste goes helps Kent councils maintain public confidence in their acclaimed waste services.

Kent Resource Partnership

The bar charts below represent the KRP’s tonnage in terms of its geographical destinations (Kent, other UK or abroad) and resource destination (recycling & composting, electricity from waste & landfill) respectively.

Further details are provided overleaf.

Kent Resource Partnership: Contractor Details

The following information has been sourced, as best as possible and practicable, from Waste Data Flow and waste management companies. On pages 5 to 15, the ‘Kent Resource Partnership’ should be taken as referring to ‘Kent County Council’ on Waste Data Flow listings. (See Note 1 on page 4 for further details)

Every effort has been made to ensure the accuracy of details throughout the publication.
