This bulletin presents the 2019 Mid-Year Population Estimates (Census based) by 5-year age group and gender for Kent County and Kent local authority districts. This data was released by the Office for National Statistics (ONS) on 6 May 2020.

### Summary of findings

- The total population of Kent (excluding Medway) is estimated to be 1,581,600 people.
- Of all the local authority districts in Kent, Maidstone has the largest population with 171,800 people. Gravesham has the smallest population with 106,900 people.
- There are slightly more female residents than male residents in Kent. 50.9% (804,900 people) residents are female and 49.1% (776,700) male. This pattern is seen in all of Kent's local authority districts.
- However, the male to female ratio changes with age. Overall there tends to be more males than there are females up to the age of 29 years. Beyond this age, there are more females than males, although the exact age at which there become more females than males does vary between each local authority district.
- The mean age of the population in Kent is 41.2 years. This is a year older than the national mean age which is 40.2 years. The mean age of a Kent female is 42.2 and a Kent male is 40.2.

## Summary of findings continued

- Kent has a slightly smaller proportion of 0-4 year olds than the national average, but on the whole Kent has a younger age profile than the national average, with a greater proportion of young people aged 5-19 years than England.
- Kent has a smaller proportion of younger people of working age compared to England, particularly in the age group 20-44 years.
- Kent has an older age profile than the national average with greater proportions of people aged 45+ years than England.

This bulletin begins by presenting the total population estimate, by gender, of Kent County and Kent local authority districts. The bulletin then goes on to present the population profile by 5-year age group and gender of each Kent local authority area in the form of population pyramids and tables.

Further details from the 2019 estimates are available on the Kent County Council website in the bulletins and excel toolkits listed below:

- '2019 Mid-Year Population Estimates: Total population of Kent authorities' looks at Kent's population in the context of national and regional change over the past year.
- 'Time series of Mid-year population estimates 1999-2019' presents total population over the past ten years.
- 'What's causing Kent's population growth?' examines the reasons behind the changes in population. (due for release July 2020)
- 'Interactive population estimates Excel toolkit' allows access to population estimates for any chosen age group for all 12 Kent local authority districts and Kent County as a whole, between 1992 and 2019.

## Note on the data

It is ONS policy to present all estimates rounded to the nearest hundred. Within this bulletin all numbers have been individually rounded and therefore may not sum. Percentages have been calculated using unrounded numbers.

The data in this bulletin will be updated in summer 2021 when the 2020 Mid-year population estimates will be released

## Total population estimates by gender of Kent local authorities

According to the revised 2019 MYPE the population of Kent is 1,581,600. Of the Kent local authority areas Maidstone has the largest population with 171,800 people. Gravesham has the smallest population with 106,900 people.

There are more females to males in Kent and this pattern is seen in all of Kent's local authority districts. Thanet and Sevenoaks have the greatest proportion of females to males (51.5% female compared to 48.5% male). The difference is smallest in Folkestone & Hythe and Swale (50.5% female compared to 49.5% male).

Table 1 presents the total population, by gender, for Kent and each of the Kent local authority areas.

**Table1: Mid-2019 total population estimate for Kent local authorities**

Data released on 6 May 2020 by the Office for National Statistics.

This table prepared by Strategic Commissioning - Analytics, Kent County Council - May 2020

All figures separately rounded to the nearest hundred so may not sum. % calculated using unrounded numbers

Percentages are calculated using unrounded numbers.

The male/ female ratio changes with age. Generally, there are more males compared to females in the younger age groups, but as age increases there

become more females to males. This is presented graphically in the form of population pyramids and in tables for Kent, each of the Kent local authority districts, and Medway Unitary Authority on pages 4 to 17.

### Mean age of Kent local authorities

The mean age of resident in Kent is 41.2 years. This is one year older than the national average of 40.2 years. The mean age of a Kent female is 42.2 years compared to the national average of 41.1 years. The mean age of a Kent male is 40.2 compared to the national average of 39.3 years.

Mean age is higher in the East Kent coastal area with the mean age of residents in Dover, Folkestone & Hythe and Thanet all at or above 43 years. Sevenoaks and Tunbridge Wells also have a higher mean age than the Kent average. Mean age is youngest in Dartford (North Kent) at 37.5 years.

Folkestone & Hythe has the oldest mean age for females at 45.4 years and the oldest mean age for males at 43.4 years. Dartford has the youngest mean age for both females at 38.1 years and males at 36.9 years.

Table 2 outlines mean age by gender for all Kent local authority district

**Table2: Mean age of population by sex in Kent local authorities**

Mean age (years)			
	Total persons	Males	Females
